## **DETAILED ACTION**

### ***Specification***

1. The title of the invention is not descriptive. A new title is required that is clearly indicative of the invention to which the claims are directed.
2. The following title is suggested: A METHOD FOR THE MANUFACTURE OF A PIEZOELECTRIC ELEMENT.

### ***Claim Rejections - 35 USC § 112***

3. The following is a quotation of the second paragraph of 35 U.S.C. 112:

The specification shall conclude with one or more claims particularly pointing out and distinctly claiming the subject matter which the applicant regards as his invention.

4. Claims 1-3 are rejected under 35 U.S.C. 112, second paragraph, as being indefinite for failing to particularly point out and distinctly claim the subject matter which applicant regards as the invention.

In claim 1, the phrase of "said diaphragm from which said first piezoelectric layer was removed" (line 11) is confusing and misleading rendering the claim as being vague and indefinite. The phrase implies that the diaphragm is removed completely, yet the previous step of "patterning ... shape" (lines 7-8) does not imply in anyway that the diaphragm is even patterned or removed.

***Allowable Subject Matter***

5. Claims 1-3 would be allowable if rewritten to overcome the rejection(s) under 35 U.S.C. 112, 2nd paragraph, set forth in this Office action.

***Conclusion***

6. The prior art made of record and not relied upon is considered pertinent to applicant's disclosure.
